I APOLOGIZE FOR THE PRICE INCREASE

The recent dramatic rise in the price of fuel, shipping, postage, and now paper has made it imperative I raise the cover price. UPS and, of course, the U.S. Postal System already have passed along significant increases. Our own adjustment merely puts us at break even; I built in no profit. It was necessary to react quickly because most of our income comes from hobby shop sales and they receive books by truck. Had there been an alternative I certainly would have chosen it.-- *Russ Reinberg*
